PROFESSIONAL SUMMARY

Dedicated Remote IT Specialist with a strong foundation in cloud infrastructure, virtualization, and multi-platform troubleshooting. Proven ability to design secure AWS environments and resolve complex technical issues through hands-on labs and ad-hoc consultancy. Committed to delivering exceptional customer service and technical guidance in distributed, remote-first settings, supported by AWS Cloud Practitioner and ITIL 4 certifications.

KNOWLEDGE, SKILLS, AND ABILITIES (KSA)

Remote Support: VPN, RDP, VDI, RMM Tools, Zoom, Slack.

ITSM: ITIL 4, Incident Management, Ticket Lifecycles, SLAs.

Cloud Infrastructure: AWS IAM, S3, EC2, VPC, Cloud Security.

OS Expertise: Windows 10/11, macOS, Linux, ChromeOS.

Identity Management: Active Directory, MFA, IAM Policy Design.

Soft Skills: Technical Documentation, Remote Communication.

CERTIFICATIONS

AWS Certified Cloud Practitioner

ITIL® 4 Foundation

TECHNICAL PROJECTS

AWS Cloud Infrastructure Lab

Objective: Designed and deployed a secure, scalable cloud environment using AWS.
Key Actions: Configured S3 buckets for data storage, launched EC2 instances for application hosting, and managed user permissions through IAM policies.
Outcome: *Demonstrated proficiency in cloud architecture and security best practices relevant to modern remote support roles.*

Remote Support & Virtualization Lab

Objective: Simulated a remote help desk environment to troubleshoot multi-platform issues.
Key Actions: Set up virtual machines using VirtualBox to test software compatibility across Windows, Linux, and macOS; utilized Slack and Zoom to document and "resolve" simulated user tickets.
Outcome: *Validated ability to provide technical guidance and problem-solve in a distributed, remote-first setting.*

Interactive Web Application (Full-Stack)

Objective: Developed a functional web application to streamline data retrieval.
Key Actions: Built a front-end interface using Angular and integrated it with external APIs; managed version control via GitLab.
Outcome: *Showcased strong technical literacy and the ability to navigate complex software ecosystems.*

ACADEMIC EXPERIENCE & VOLUNTEER WORK

IT Case Studies & Simulations | WGU
2023 – Present

Applied ITIL 4 frameworks to resolve mock service desk incidents, focusing on reducing downtime and improving user satisfaction.

Completed rigorous coursework in Network Administration and Operating Systems, maintaining a focus on remote troubleshooting and security.

Technical Support Volunteer | Independent Consultant
2024 – Present

Provided ad-hoc hardware and software troubleshooting for peers and local community members, including macOS data recovery and network setup.

Translated complex technical concepts into easy-to-understand instructions for non-technical users, mirroring a professional customer service environment.

EDUCATION

Western Governors University (WGU)
2023 - Present
(Expected Graduation: 2026)

Bachelor of Science in Software Engineering

Great River Connections Academy (High School)
2019 - 2023

Diploma
